SUMMARY

Frontend developer with 8+ years building production web applications in Angular and React. Strong in TypeScript, modern CSS (Flexbox, Grid, SCSS), component architecture, and REST and GraphQL integration. Led the frontend team at a national pharmacy retailer, setting priorities and mentoring developers. Comfortable taking a feature from design handoff through testing, code review, and release. Particular strength in web performance: profiling with Lighthouse, trimming bundle size, and fixing Core Web Vitals regressions.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS/Sass, Liquid

Frameworks: Angular, React, Next.js, AngularJS, Node.js, Angular Material, Bootstrap, Tailwind CSS

Testing: Karma, Jasmine (unit and integration), Cypress (end-to-end)

APIs: REST, Firebase, GraphQL, JSON, token-based authentication, role-based access control

Performance: Lighthouse audits, Core Web Vitals (LCP, CLS, INP), lazy loading, code splitting, image optimization, responsive and cross-browser development

E-commerce: Shopify (Liquid theme development), VTEX

Tools: Git, GitHub, Jira, Monday.com, VS Code, Postman, Figma, Google Tag Manager, CI/CD

Ways of working: Agile and Scrum, Kanban, sprint planning, backlog grooming, code review, cross-functional collaboration

EXPERIENCE

Frontend Developer | CodersLab

Santiago, Chile (Remote) | May 2025 - Aug 2026

- Build reusable UI components in React, TypeScript, and SCSS, replacing one-off implementations with a shared library the whole team now works from.
- Write unit tests in Karma and Jasmine that catch regressions before they reach QA.
- Wire up REST APIs for authentication, role-based access, and dynamic data rendering.
- Run sprint planning and backlog grooming in Jira, keeping the team on a steady two-week release cycle.
- Review pull requests and work day to day with QA, backend, and design.

Frontend Developer | Gradiweb

Bogotá, Colombia | Nov 2024 - Mar 2025

- Sped up client Shopify storefronts through lazy loading, image optimization, and targeted fixes from Lighthouse audits, improving LCP and CLS across every store in the portfolio.
- Built custom Shopify themes in Liquid, HTML, and CSS to match each client's brand and UX requirements.
- Pulled product and order data through GraphQL and REST APIs.
- Tracked down and fixed cross-browser and responsive bugs across multiple live storefronts.
- Worked in a feature-branch Git workflow, with delivery tracked in [Monday.com](https://monday.com).

Frontend Developer, Team Lead | Farmatodo

Bogotá, Colombia | Mar 2021 - Jul 2023

- Led the frontend team: set priorities, owned delivery dates, and mentored developers on Angular and testing practices.
- Designed and shipped a medication scheduling feature for a national pharmacy e-commerce platform, giving customers recurring prescription reminders and driving repeat orders.
- Added customer product reviews across the catalog by integrating the BazaarVoice API through Google Tag Manager.
- Ran the Angular and Node.js upgrade across the platform, clearing out deprecated dependencies and cutting build times.
- Covered critical flows with Karma and Jasmine unit tests to keep releases stable on a high-traffic site.

Frontend Developer (Contract) | Arbelos Interactive

Ontario, Canada (Remote) | Mar 2020 - Mar 2021 · Jul 2023 - Oct 2024

- Built the frontend for a video streaming platform in React and Next.js, including multi-profile login, watch history, and a recommendation feed.
- Developed admin dashboards in Angular and Angular Material for managing content, catalog, and users.
- Integrated the CMS and authentication APIs, including session handling and protected routes.
- Wrote unit tests in Karma and Jasmine, and end-to-end tests in Cypress.
- Worked remotely with backend, design, and DevOps across time zones to hit contract milestones.

EDUCATION

Associate Degree in Computer Science (Técnico Superior Universitario en Informática)

Instituto Universitario de Tecnología Alonso Gamero · *Falcón, Venezuela*
