SUMMARY

Senior frontend developer with 10+ years building production web applications in Angular and React. I own features end to end, from design handoff through testing, code review and release, working closely with QA, backend and design. I have mentored developers and run code reviews since 2018, and I stepped in to coordinate the team and sprint planning when a project needed it. Particular strength in web performance and accessibility: profiling with Lighthouse, trimming bundle size, fixing Core Web Vitals regressions and building components that work with a keyboard and a screen reader.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS/Sass

Frameworks: Angular, React, Next.js, Tailwind CSS

Testing: Karma, Jasmine (unit and integration), Cypress (end-to-end)

APIs: REST, GraphQL, token-based authentication, role-based access control

Performance: Lighthouse audits, Core Web Vitals (LCP, CLS, INP), lazy loading, code splitting, image optimization, responsive and cross-browser development

Accessibility: WCAG, semantic HTML, keyboard navigation, screen reader support

Tools: Git, GitHub, Jira, Figma, CI/CD

Ways of working: Agile and Scrum, sprint planning, backlog grooming, code review, mentoring, AI-assisted development

EXPERIENCE

Frontend Developer - CodersLab May 2025 - Aug 2026
Santiago, Chile (Remote)

- Built a shared component library in React, TypeScript and SCSS, replacing the one-off implementations the team had been maintaining.
- Wrote unit tests in Karma and Jasmine that caught regressions before they reached QA.
- Wired up REST APIs for authentication, role-based access and dynamic data rendering.
- Stepped up to coordinate the team and run sprint planning and grooming until a project lead was hired.
- Reviewed pull requests and worked day to day with QA, backend and design.

Frontend Developer - Gradiweb Nov 2024 - Mar 2025
Bogotá, Colombia

- Sped up client storefronts through lazy loading, image optimization and targeted fixes from Lighthouse audits, improving LCP and CLS across the portfolio.
- Tracked down and fixed cross-browser and responsive bugs across multiple live sites.
- Pulled product and order data through GraphQL and REST APIs.

Frontend Developer (Freelance) - Arbelos Interactive Sep 2020 - Oct 2024
Ontario, Canada (Remote) - contract work, by project

- Built the frontend of a video streaming platform in React and Next.js: multi-profile login, watch history and a recommendation feed.
- Developed admin dashboards in Angular and Angular Material for content, catalog and user management.
- Integrated the CMS and authentication APIs, including session handling and protected routes.
- Wrote unit tests in Karma and Jasmine, and end-to-end tests in Cypress.
- Worked with backend, design and DevOps across time zones to hit contract milestones.

Frontend Developer - Farmatodo Mar 2022 - Jul 2023
Bogotá, Colombia - team of 6 developers

- Owned Farmatodo Prime on the frontend, the chain's subscription program for free delivery and member offers.

- Integrated PSE payments, the bank transfer method most used in Colombia, into the checkout flow.
- Built Pillbox, a medication scheduling feature that gives customers recurring prescription reminders.
- Delivered the product reviews feature end to end, integrating the BazaarVoice API across the catalog.
- Ran the Angular upgrade from version 11 to 16 across the platform, one major release at a time, clearing deprecated dependencies and cutting build times.
- Covered critical flows with Karma and Jasmine unit tests to keep releases stable on a high-traffic site.
- Ran production deployments for the Colombian and Venezuelan storefronts, and took weekend on-call rotations for production incidents.

Frontend Developer - BlackSip Mar 2021 - Feb 2022
Bogotá, Colombia

- Worked on the Farmatodo e-commerce platform as part of the agency team, building catalog and checkout interfaces in Angular.
- The client hired me directly once the contract ended.

EARLIER EXPERIENCE

Frontend Developer at Tita Media (Jun - Nov 2020), S9 Consulting (Mar 2018 - Jun 2020, Jacksonville, Remote) and Tsserapp (May 2016 - May 2018). Built VTEX storefronts for Colombian retail brands, marketing sites, dashboards and internal tools in HTML, CSS, JavaScript and Angular. Mentored junior developers and ran code reviews from 2018.

EDUCATION

Associate Degree in Computer Science (Técnico Superior Universitario en Informatica)
Instituto Universitario de Tecnologia Alonso Gamero - Falcon, Venezuela

CERTIFICATIONS

React.js and Next.js (2024), Angular Universal InDeep (2023), Maximum Productivity: Time Management (2023), TypeScript (2023) - Udemy

LANGUAGES

Spanish: Native. **English:** Professional working proficiency.
